**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

### ***Claim Objections***

Claim 1 recites the limitation "Final Iso Data" in lines 7-11. There is insufficient antecedent basis for this limitation in the claim. It is unclear if the applicant is referring to same Final Iso Data collections or new Final Iso data. Proper antecedent basis requires a "the" or "said" before terms previously used in the claims. New elements must use new terminology or distinctions.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Sasaki US 2002/0077988.

As per claims 1

Sasaki teaches an IsoClients exchanging data and receiving one or more IsoProgs (keys from said IsoServers (certificate authority) [0041] . Sasaki teaches applying said IsoProgs (encryption key) to one or more collections of RawData (content key) to generate one or more collections of IsoData (content package) [0041]. Sasaki teaches transmitting one or more collections of IsoData to one or more MinClients (commercial distributor) [0041]. Sasaki teaches applying one or more HeteroProgs (reencrypt) to one or more collections of IsoData to generate one or more collections of Final IsoData (encrypted with user key) [0042]. Sasaki teaches transmitting one or more collections of FinalIsoData to one or more IsoServers and IsoClients (user) [0042]. Sasaki teaches applying one or more InvIsoProgs (user key) to one or more collections of FinalIsoData to generate one or more collections of Final Data (content key, content) [0044].

Sasaki does not explicitly teach the source of public private key pairs, but it is well known in the art to obtain key pairs from a trusted certificate authority. The examiner takes official notice as such.

As per claim 6, Sasaki only teaches one HeteroProg (reencrypt with user key) [0042].
